Problem Attic

www.problem-attic.com

Audience: K-12 Teachers

Cost: Free

This website is a huge question bank for all kinds of math topics (a lot of multiple choice). The great thing about it is if you like a question all you have to do is click 'add' and it will add the questions to a new worksheet for you (with the answers at the bottom)...no cutting & pasting necessary!! Signing up is free so **definitely worth checking out!**

March Madness Day 8: "Problem-Attic" Test Creation

Teachers are always looking for good assessment questions. Even if it's just for a warm up activity, teaching students the strategies of how to break down a test question is a necessity in today's classroom. Problem-Attic is a free resource for teachers that houses over 80,000 questions from the New York Regents, State Assessments and Academic competitions. It is also extremely easy to use.

Sign up for Problem-Attic is free. You can create assessments and/or flashcards (overheads) in four easy steps: select, arrange, format, preview (print). Selecting questions is as easy as clicking a button. Once you have selected your questions, you can then arrange the questions moving them in any order you wish.

I selected the grid view with lined the questions up like slides in a Powerpoint presentation and it was as easy as drag and drop. The format option, lets you choose between columns, spaces for answer choices, or printing flashcards in half sheet or quarter sheet format. Then you simply print.

...If you are looking for a quick assessment to use within your classroom, I have not been able to find any tool easier than this.

Mike Beckwith originally shared this post to **Educators on Google+** (Mathematics):

I recently found a **wonderful website** I thought many of you might like to try out. www.problem-attic.com is an amazing new website that takes all of the public standardized tests from the last decade or so, and puts them online into a wonderful PDF creator. That's right, you can pick and choose whichever questions you like from all public standardized tests from around the country and use them to create and **print your own individualized practice tests** based on actual state tests.

Problem-Attic - www.problem-attic.com - While this site is geared toward state assessment in New York, you should be able to find resources to help you prepare students for Tennessee assessments.

The site is very user-friendly and worth a visit.

*Ed. note: for the first few months after the launch of Problem-Attic, the website had NY Regents questions only. It expanded to 27 states over the next six months.

I just discovered your site a few months ago, and it is **amazing!** Right now I'm in the process of making flashcards for my students so that they can study for their upcoming Global Studies Regents exam. **Your program is so helpful.** It sure beats the old fashioned way that I used to do it, which included re-typing new regents questions into a word document after each new exam was administered.

Thank you again. You have gone above and beyond what I would expect, especially from a free site.

This is an **amazing collections of problems**, and I use it quite a lot – every week – and the students and parents like it. It is so easy to make a quiz or test in under 10 minutes, and I would pay to have a this program available to me – but it is FREE! What gift to educators, parents and students.

The New York Regent questions in mathematics is organized according to topics – Algebra 1, Geometry, etc. This will greatly cut down the time when looking up topics to cull problems for a quick Quiz, test or sponge activity.

Okay! It's Friday night, all of my colleagues are at a football game, and I am at home going through emails that I had no time to get to through during the week. I get to the one where our curriculum director casually mentions he purchased a subscription to "Problem-Attic." Great, I think, worksheets? We are living in the 21st century, fighting to switch an old school paradigm, and he purchases something that makes worksheets?

Wow, was I wrong. **Problem-Attic is remarkable! What a service you have done for the teachers who are struggling to meet the many demands of the classroom.** I am so eager to show it to the faculty. I think I am going to wait till a faculty meeting, flash a QR code, and grade on the spot! Their reaction will be priceless!

You, my friend, deserve a medal, and it should be gold!

I Love, Love, LOVE your site!!! I am in the process of trying to get computers for my classroom. I have played around in the area where I can build a test and students can take it on line (thus the working toward getting computers for my room.) I have even played around with the questions on smart phones and how they would load. I am seeing where you are adding a lot more questions. I really appreciate this as a classroom teacher and when I go around the state and country doing my workshop I am letting people know about you.

I Love, Love, Love this site.... yes, LOVE it!!! Thank you!
